

PROJECT'S AIMS

Mainstream disability into
disaster management cycle

Raise awareness of persons with disabilities
and their caregivers about the increasing
risks of disasters

Make persons with disabilities and their
caregivers better prepared for natural
disasters

Support the caregivers in the disaster
management processes

Increase the knowledge of authorities and
policy makers, volunteers in civil protection
and professionals working in disability field

Build a culture of disability and disasters in
community-at-large

Empower persons with disabilities through
effective disaster management

Co-funded by the
Erasmus+ Programme
of the European Union

PROJECT RESULTS

European Reference Framework on Effective Disaster Management

This reference framework is intended to provide a reference outline of the current state of disaster management initiatives, needs and gaps in effective disaster management for caregivers of persons with disabilities (PwD) across Europe. The framework is designed to meet the needs of institutions, trainers and teachers working for empowerment of PwDs and their caregivers on disaster management process.

Training Content on Effective Disaster Management For Caregivers of Persons with Disabilities

This training content is designed to provide the caregivers of PwDs with learning resources on effective disaster management covering prevention, response and recovery stages of disaster management of earthquakes, floods, fires and epidemics based on learning outcomes and learning units to be defined after identification of needs and key points correspondingly.

Accessible Learning Hub with Accessible Learning Materials for Persons with Hearing and Vision Impairments

This Accesible Learning Hub will be developed to raise awareness of persons with disabilities about increasing risks of disasters, their consequences, management of disasters and provide resources to reduce their vulnerability and increase their resilience towards the disasters through an accessible learning hub to persons with vision and hearing impairments.

Inclusive Disaster Management Handbook

This management handbook is intended to be a reference document with a coherent set of practical guidelines and principles on how to mainstream a more inclusive disaster management strategies, policies and programmes. The handbook will also serve as a roadmap for policy makers to enable them to design, adjust and implement more inclusive disaster management plans, programmes and innovative strategies taking into account specific needs of persons with disabilities.
